EverLast **Legend Series**  
Custom Occupancy Sensor Option

## Built For You

Oxford, N.C. based Santa Fe Natural Tobacco Company, nestled quietly in the heart of tobacco country recently benefited from a large-scale LED lighting upgrade using EverLast Lighting LED high bay lights. Since the completion of the project, the Santa Fe Natural Tobacco Company's 168,000 square foot tobacco pressing facility has seen immediate improvements in workplace visibility and decreases in lighting maintenance costs, and over 5000kWh of energy saved each month thanks to the increased efficiencies of EverLast's LED technology, and it's use of occupancy sensors to effectively control lighting usage.

The end user is very pleased with the results of better light, a new look to their facility, and the energy savings. End user expects to convert other areas of their property in Oxford to all LED in the next 2-3 years.
